

King Vision® Pediatric aBlade™

Video laryngoscope

Key Benefits

Affordable

- The King Vision aBlade is an excellent solution to solve the issue of limited availability of advanced visualization solutions.
- With King Vision, you can improve patient care by having high performance visualization capabilities for every intubation at an affordable price.

Portable

- King Vision is lightweight, self-contained, battery operated and water resistant. King Vision can be used continuously for about 80 minutes making it highly portable.
- The aBlades are individually packaged. Each blade is disposable, eliminating concerns of cross contamination. King Vision offers the choice of two blade types depending on preferred tube delivery technique.

Durable

- King Vision and aBlades have been designed to be your primary tool for all intubations.
- Video output capability is compatible with external monitor and recording devices.
- The robust, full-color, non-glare display can resist repeated cleaning. The aBlade video adapter is reusable, designed with materials that can withstand repeated use.

King Vision® video laryngoscope

Visionary performance in the palm of your hand. When it comes to visualizing the airway for routine or difficult intubations, you need a tool that you can depend on each and every time. King Vision is designed for indirect visualisation of the vocal cords which minimize the need for tissue manipulation and improves the ability to see anterior airways. Such reliable performance is a necessity, not an option. King Vision comes with the choice of two blade types that allow users to keep their preferred technique in terms of tube delivery, offering a unique flexibility.

Full range of blade sizes

The King Vision aBlade system offers a complete range of video adapters and disposable blades for a wide range of pediatric patients. This allows you to have one solution to cover your intubation cases from infants to adults, whether in the OR, ICU or ER. The King Vision aBlade solution can also be implemented in the prehospital setting for Emergency Services.

Portable

The King Vision display is lightweight, self-contained, battery operated, and water-resistant. The reusable display and video adapter come packaged in a protective case. aBlades are individually packaged making King Vision very portable.

Affordable

The disposable blades allow for economical use of the King Vision for most of your intubations. Combined with the high performance visualization capabilities this offers great value while also delivering excellent patient care. Take the guess-work out of your intubations. See the vocal cords and confirm placement of the endotracheal tube.

Durable

The King Vision is designed to be your primary tool for intubations. The high-quality display comes with a 1-year warranty. The robust, full-color, smudge-proof, non-glare display can resist repeated cleaning and normal use wear and tear.

Pediatric aBlade

| Age | Size 1 | Size 2 | Size 3 |
|-----|--------|--------|--------|
| 0 | Yes | No | No |
| 1 | Yes | Yes | No |
| 2 | Yes | Yes | No |
| 3 | Yes | Yes | No |
| 4 | No | Yes | No |
| 5 | No | Yes | Yes |
| 6 | No | Yes | Yes |
| 7 | No | Yes | Yes |
| 8 | No | Yes | Yes |
| 9 | No | Yes | Yes |
| 10 | No | Yes | Yes |
| 11+ | No | No | Yes |

Size recommendation:

For infants and children the small video adapter 1-2 and associated blades are indicated:

- aBlade size 1 (Infant patients <4 years)*
- aBlade size 2+2C (Child patients 1-10 years)*

For larger children and adults the associated blades are indicated:

- Direct Connect blade size 3+3C (Children >5 years and Adults)*

*Size ranges are based on teeth-to-vallecula data for the given ages, tracheal tube sizing recommendations and actual experience.

A medical professional must evaluate on a patient-by-patient basis.
