

A BRONCHOSCOPE FOR EVERY SCENARIO

AMBU MAKES BRONCHOSCOPY SAFER IN THE BRONCHOSCOPY
SUITE, OR AND ICU

Ambu® aScope™ Broncho single-use portfolio

Ambu

ONE SINGLE-USE BRONCHOSCOPY SOLUTION

SOLVES A BROAD RANGE OF BRONCHOSCOPY CHALLENGES

The Ambu® aScope™ Broncho portfolio provides two different product families with a variety of bronchoscope sizes, which are on hand whenever you need them.

BRONCHOSCOPY SUITE

High performance and cost savings

The flexibility and high performance you need for a complex and demanding workflow of diagnostic and therapeutic procedures where needs arise fast.

OR AND ICU

The portability and essential performance you need for routine procedures ranging from difficult intubations and thoracic anesthesia in the OR to secretion management in the ICU.

3 WAYS AMBU SINGLE-USE BRONCHOSOPES CAN BENEFIT YOUR ORGANIZATION

1. COST CONTROL

With one bronchoscope per procedure, total cost of ownership can easily be calculated. It reduces financial uncertainty because you only pay for what you need and can increase or decrease the number of procedures performed as required. What's more, because each bronchoscope is only used once, there is no degradation in performance and no concerns about the costs and downtime associated with the repair of reusable endoscopes.

A number of studies have shown that single-use bronchoscopes can be cost-effective compared to reusable ones^{1,2}. Chart 1 shows the total per-procedure cost associated with the usage of reusable bronchoscopes.

2. STREAMLINED WORKFLOW

Having an experienced, reliable partner simplifies procurement and enables you to standardize your single-use endoscopy solution across your hospital, and even across clinical areas other than bronchoscopy, like GI, urology and ENT.

Ambu single-use endoscopes can be ordered from day to day, and you have a variety of sizes available in storage whenever you need them. This saves you from the inefficiency and bother of cancellations and rescheduling. In addition, there is no need for reprocessing. Single-use endoscopes also free up resources and create new opportunities to, for example, increase the number of bronchoscopies.

3. INCREASED SAFETY

Improper reprocessing of bronchoscopes poses serious patient safety and infection risks^{5,6,7,8}. In addition, your staff is exposed to contaminated scopes, and detergent and chemicals used for reprocessing. Our sterile single-use bronchoscopes eliminate the risk of patient-to-patient contamination. This can be especially relevant for the immunocompromised patient population, and it may reduce readmissions and their associated costs⁹.

MEET THE FAMILY

Ambu® aScope™ 5 Broncho BRONCHOSCOPY SUITE

A NEW STANDARD FOR SINGLE-USE BRONCHOSCOPES

Ambu® aScope™ 5 Broncho provides the excellent maneuverability, next-level imaging and flexibility you need for your complex and demanding workflow.

Ambu® aScope™ 5 Broncho HD (5.0/2.2 and 5.6/2.8)

Excellent maneuverability even when working with endotherapy instruments, including high-frequency tools.

Ambu® aScope™ 5 Broncho (4.2/2.2)

A unique opportunity to take advantage of a regular-sized working channel in a thin bronchoscope.

Ambu® aScope™ 5 Broncho (2.7/1.2)

The ultrathin aScope 5 Broncho 2.7/1.2 is suitable for ET tubes as small as 3.5 mm while providing a 1.2 mm working channel.

DISPLAYING AND PROCESSING UNITS

Ambu® aBox™ 2

Compact, flexible and innovative design comprised of a light source, a processor and a recorder, all in one compact design.

UNIQUE, INTEGRATED SAMPLING SOLUTION

Ambu® aScope™ Broncho Sampler Sets

Award-winning closed-loop single-use system reduces the risk of sample contamination and protects samples from start to finish.

Ambu® aScope™ 5
Broncho Sampler Set

Ambu® aScope™ 4
Broncho Sampler Set

Ambu® aScope™ 4 Broncho

OR AND ICU

PORTABLE, LIGHTWEIGHT, EASY TO SET UP

From intubations and thoracic anesthesia in the OR to routine bronchoscopy in the ICU, aScope 4 Broncho provides essential performance in a sterile, cost-efficient, ready-to-go solution.

Ambu® aView™ 2 Advance

The modern, intuitive, lightweight displaying and processing unit is easy to take with you, set up and use.

CONVENIENT WORKSTATIONS

aCart™ Compact

The aCart workstations provide convenient storage without taking up a lot of space.

Ambu® aScope™ 4 Broncho Slim (3.8/1.2)

For a wide range of bronchoscopy procedures, from difficult intubation to the placement and control of double lumen tubes and bronchial blockers in the OR.

Ambu® aScope™ 4 Broncho Regular (5.0/2.2)

An excellent solution for a range of procedures from intubation and training of intubation skills to bedside bronchoscopy, including PDT procedures.

Ambu® aScope™ 4 Broncho Large (5.8/2.8)

With a suctioning channel of 2.8 mm, it can be used for secretion management.

ONE RELIABLE PARTNER

THE WORLD'S MOST INNOVATIVE SINGLE-USE ENDOSCOPE COMPANY

Ambu launched the world's first single-use flexible bronchoscope in 2009, and in 2021 over 1.5 million of our single-use endoscopes were used in thousands of hospitals across clinical areas. That's more than all other single-use endoscope companies combined.

With one experienced, reliable provider, you can standardize your single-use endoscopy solution across your hospital departments and clinical areas.

3 ADVANTAGES OF WORKING WITH THE LEADERS IN SINGLE-USE ENDOSCOPE INNOVATION

1. WE COLLABORATE WITH LEADING ENDOSCOPISTS TO MEET YOUR NEEDS

Ambu is the largest single-use endoscope company in the world. We invest 20% of our single-use endoscopy revenue back into R&D. This has enabled us to build five global single-use innovation centers. Hundreds of dedicated Ambu engineers work closely with leading endoscopists to incorporate their input and deliver the best innovations rapidly.

2. A MODULAR APPROACH BENEFITS YOU WITH RAPID INNOVATION

Our innovation teams are set up to share components and technology with each other. As a result, multiple development projects occur simultaneously. This generates rapid innovation, which puts the latest technology in your hands.

3. YOU CAN COUNT ON US TO DELIVER

High-scale, low-cost manufacturing at our own facilities in Malaysia, Indonesia, the US, Europe and the largest single-use endoscope factory in the world, ensure that you can rely on us to deliver.

LEADING THE WAY WITH SUSTAINABLE PRACTICES AND TARGETS

From raw material extractions to disposal, the choices we make throughout the life cycle of our products not only affect our own operations, but also our suppliers and customers.

Our plastic and product strategy focuses on the areas where we believe we can make a difference in product design, production and disposal after end-of-use.

	SHORT TERM	MEDIUM TERM	LONG TERM
DESIGN	Identify areas for improvement	Reduce material use Eliminate use of PCV	Use sustainable materials Design for recycling
PRODUCTION	Operation Clean Sweep® program	Reduce unnecessary items in product packs	Waste to be reused or recycled
END-OF-USE	Plastic Bank® recycling partnership Take-back program with incineration & energy recovery (US & IT)	Take-back program with recycling (DE)	Recycling at scale

Visit www.ambu.com/sustainability or scan the QR code to read more about our targets.

A HISTORY OF BREAKTHROUGH IDEAS

Ambu has been bringing the solutions of the future to life since 1937. Today, millions of patients and health-care professionals worldwide depend on the efficiency, safety and performance of our single-use endoscopy, anesthesia, and patient monitoring.

Manifestations of our efforts have ranged from early innovations like the Ambu® Bag™ resuscitator and the Ambu® BlueSensor™ electrodes to our newest landmark solutions including Ambu® aScope™ – the world's first single-use flexible endoscope. We continuously look to the future with a commitment to deliver innovative quality products that have a positive impact on your work.

Headquartered near Copenhagen in Denmark, Ambu employs 4,500 people in Europe, North America and the Asia-Pacific region.
