

**STERILE.
SINGLE-USE.
PROBLEM
SOLVED.**

Ambu® aScope™ Duodeno

Ambu

Ambu® aScope™ Duodeno

THE STERILE, RELIABLE AND COST-EFFECTIVE SOLUTION

Produced by the world's leading single-use endoscope supplier, Ambu aScope Duodeno is a single-use endoscope for ERCP procedures. With no reprocessing or repair, sterility straight from the pack and the level of performance you are used to, aScope Duodeno helps optimize workflow, productivity and safety.

Sterile, Single-Use

Sterile straight from the pack for peace of mind, aScope Duodeno removes the risk of patient cross-contamination.

No Cleaning, Reprocessing or Repair

As it is single-use, there is no post-procedure cleaning or reprocessing. Eliminates exposure of harmful reprocessing chemicals to your staff. This saves time, frees up resource and helps you streamline your workflow.

New Every Time

Just open up the pack, plug it into the aBox and the system is ready. aBox Duodeno connects directly to a medical-grade monitor and the documentation systems in use. No white balancing required, aScope Duodeno is part of a ready-to-use endoscope solution consisting of the single-use duodenoscope and Ambu® aBox™ Duodeno unit.
