# Ambu® Regulator
## How to Set the Pain Pump Flow Rate
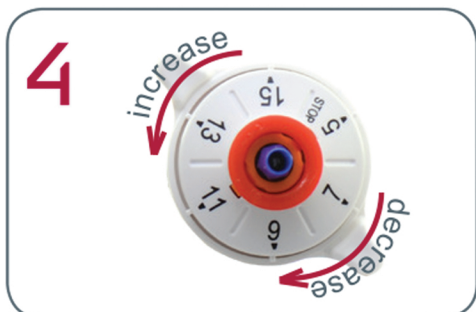

**Ambu** *Ideas that work for life*

**1**

Remove blue lock guard.

**2**

Gently pull white dial up on regulator.

**3**

To set the Regulator to desired flow rate, rotate the white dial and align with black position indicator. Increase flow rate turn counter clockwise. Decrease flow rate turn clockwise.

**4**

increase / decrease

Caution: Regulator is equipped with positive stop at max and min flow rates. Do not force past the positive stop, as this may damage the regulator.
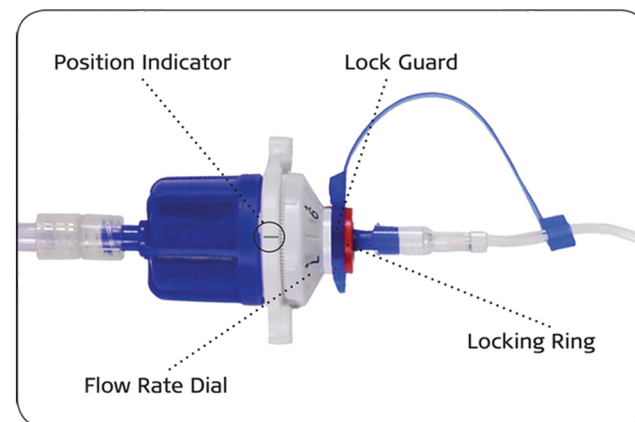

**5**

Push the white dial back in place to set flow rate. **Avoid pressing the red ring at all times.**

**6**

To secure flow rate **temporarily**, insert blue lock guard between the red ring and the white dial.

**7**

Please *DO NOT Touch* the RED Locking Ring
