

Ambu® Man Airway Wireless

Ambu® Man Airway Instrument

Arms and legs available

Key features

- State of the art integrated wireless technology
- Unique Ambu Manikin Management Module
- Robust and durable
- Real time performance feedback of compressions and ventilations
- Advanced airway management
- License free self-training module

AmbuMan Airway

The AmbuMan Airway manikin is ideal for advanced airway training and CPR training. It is equipped with the unique Ambu Manikin Management Module. The manikin software does not require a license and supports all network connection options. The unique Ambu Manikin Management Module provides control, documentation and monitoring capabilities while CPR parameters and training events are documented into a report for debriefing.

The robust stainless-steel chest cage makes AmbuMan Airway an ideal training option for mechanical CPR devices. The chest tension is adjustable for realistic CPR training scenarios. The manikin can be used for defibrillator pad placement. It is equipped with a manual carotid pulse.

Designed with an airway that opens only when the head is positioned correctly, training of advanced airway skills such as: direct laryngoscopy, video laryngoscopy, intubation, OPAs, Laryngeal mask airways, King LTS-D, and Combitubes is possible. This manikin can also be used for training on transport ventilators.

During training performance feedback is available to the instructor and trainee. After the training, CPR parameters and training events are documented and included in the training report, making debriefing simple and logical. AmbuMan Airway features standard license free self-training module for CPR recertifications.

Optional Additions: IV Arm trainer, IO Trainer, Arms, Legs

Technical Data

AmbuMan Airway Wireless	Connectivity	✓	WLAN or LAN, Ambu Wireless Technology built on latest generation of Intel WLAN Modules
	Ambu Manikin Management Module	✓	Operating system independent and browser-based control, programmable scenarios, individual documentation for up to 4 participants, parallel display and control of up to 6 manikins, parallel multiple access of various devices for visualization of the performance
	Power supply	✓	AC adapter, battery pack or PoE (optional, not included in packaging)
Airway-Management	✓	Training of airway management: laryngeal masks, laryngeal or tracheal tube. Bag-mask ventilation and use of the Guedel airway. Airway opens only with correct hyperextension	
Manual feedback display	✓	Extendable Ventilation volume, compression depth, hand position, stomach inflation	

Specifications

Weight torso with transport bag	13 kg
Length torso	80 cm
Length full body	165 cm

Order information

Item number	Description
A 284 427 000	AmbuMan Airway Wireless, Torso, integrated Ambu Wireless Technology, Ambu Manikin Management Module, Transport bag/ practice mat
A 284 424 000	AmbuMan Instrument, Torso, Transport bag/ practice mat

Accessories

234 000 077	Battery Pack
234 000 706	Upgrade Kit full body
266 000 517	Ambu Face piece (1 piece)
234 000 794	Transport bag / practice mat

Ambu Man Airway Wireless Torso

Monitoring instrument

Ambu Manikin Management Module

Transport bag (practice mat incl.)
