

Integrated, closed-loop
sampling with aScope™

Ambu® aScope BronchoSampler™

Streamline procedures
and protect samples with aScope
BronchoSampler, a fully-integrated,
closed-loop solution only for
aScope™ 4 Broncho.

A simplified sampling process

A one-of-a-kind, purpose-built system, the aScope BronchoSampler improves workflow efficiency by allowing a single clinician to easily perform bronchoscopic sampling as part of BAL or BW procedures – from system assembly to sample capture.

aScope BronchoSampler also features a vacuum bypass that further simplifies procedures by enabling you to change between suction and sampling without a suction tube switch.

Fewer lost and contaminated samples

As a single-use, sterile, closed-loop system aScope BronchoSampler reduces the risk of sample loss and guarantees sample quality from start to finish. By minimizing the risk of sample contamination or exposure, aScope BronchoSampler also supports accurate and timely diagnostics as well as the safety of both patients and clinicians.

Innovative, integrated system

aScope BronchoSampler is designed to integrate seamlessly with your aScope 4 Broncho. It comes with all the critical components that you need, allowing you to effectively and efficiently perform BAL and BW procedures. And because it's always ready when you are, aScope BronchoSampler minimizes the significant risks to patients that can result from equipment and workflow delays.

aScope BronchoSampler

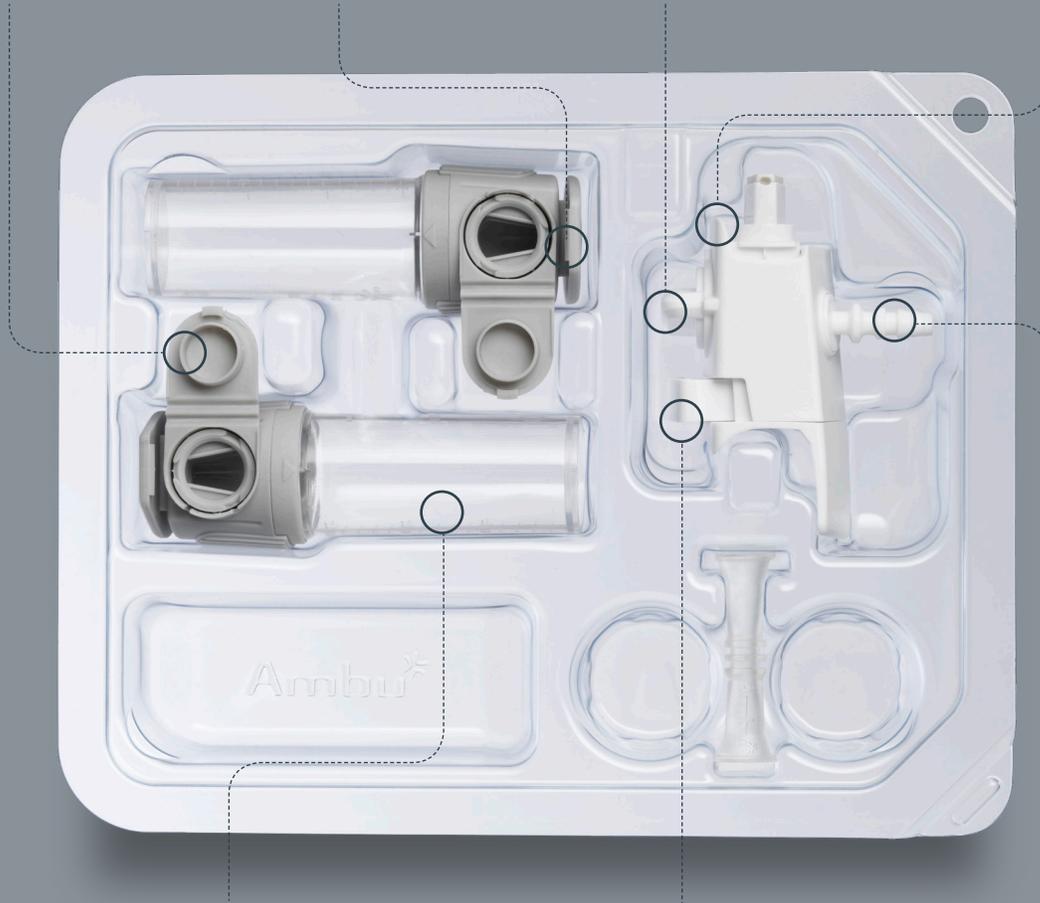

– everything you need in a sterile, portable and pre-packed tray

Lid closes to prevent sample contamination

Flip top to easily disengage sealing connection and remove sample container

Flow switch for easily changing between suction and sampling

Interface for sealing connection

Transparent container allows for monitoring of sample volume and texture

Attachment lock to aScope 4 Broncho

Suction connection

Item No.	Item Description	Quantity
480200000	aScope BronchoSampler, specimen sampling system	5
SET477001	aScope 4 Broncho Regular with aScope BronchoSampler	5
SET478001	aScope 4 Broncho Large with aScope BronchoSampler	5
480300000	aScope BronchoSampler SC, sample container	10
