# Single-Use Flexible Rhinolaryngoscope

### BE MORE PRODUCTIVE, WHEREVER YOUR WORK TAKES YOU

Whether you need high-quality imaging and easy connectivity options for the outpatient cinic or a portable grab-and-go solution for when you're called to a consult, Ambu aScope 4 RhinoLaryngo can help you be more productive.

### Excellent imaging and connectivity for the diagnostic procedures

The aScope 4 RhinoLaryngo Slim endoscope is designed with a small 3.0 mm outer diameter to help minimize patient discomfort during rhinolaryngoscopy procedures.

The solution includes the high-quality, portable full-HD Ambu aView 2 Advance monitor. The monitor's excellent imaging capabilities combined with the scope's high-bending angles and precise tip motion enable you to identify anatomical structures confidently.

Furthermore, the solution enables you to record images and videos of the procedure, which you can then transfer to the PACS to enable access from your Electric Health Records (EHR) system.

#### Single-use efficiency streamlines your workflow

The aScope 4 RhinoLaryngo endoscope is a single-use flexible rhinolaryngoscope that helps you be more productive:

- No cost or hassle associated with cleaning and repairs
- Simply take it with you, use it and then discard
- High-quality video imaging that doesn't compromise on the portability you require for consultations outside the clinic
- A brand-new endoscope with the same high quality for every procedure

You can always count on cost transparency with the aScope 4 RhinoLaryngo endoscope.

# Ambu® aScope™ 4 RhinoLaryngo Slim

#### **KEY BENEFITS**

High quality imaging on the full-HD Ambu<sup>®</sup> aView™ 2 Advance monitor

Wide range of EHR connectivity options

Transfer patient imaging data to PACS

Always ready avoiding any delays

Improves workflow with no hassle of cleaning and repairs

Low investment cost
