

Ambu[®] Disposable Pressure Manometer

Key Benefits

- The slim design makes it easy to monitor pressure with minimum obstruction of the view of the patient's face
- The single patient use concept offers minimized risk of cross infection
- This product does not contain any natural rubber latex or PVC
- The manometer has a color coded scale to give enhanced visual support during ventilation. The color coding scale is only for visual support. The correct ventilation pressure must be determined by the medical professional

The Ambu Disposable Pressure Manometer for single patient use is intended to be used for monitoring the patient's airway pressure.

The Ambu Disposable Pressure Manometer is suitable for use with Ambu resuscitators or other resuscitators, hyperinflation bags, CPAP masks or circuits.

Specifications

Size	
Length	55 mm (2.17")
Diameter	22 mm (0.87")
Weight	6.4 g
Connector size	ID 3.7 mm (.15")
Materials	
Connector	SEBS
Spring	CuSn
Housing	SB
Piston	PP
Membrane	Silicone
Operating temperature range	-18°C a 50°C
Storage temperature range	-40°C a 60°C
Measuring	
Measuring Limits	0-60 cm H ₂ O (hPa)
Accuracy	+/- 2 cm H ₂ O (hPa) a 7.5, 10, 15, 20, 30 H ₂ O (hPa) +/- 3 cm H ₂ O (hPa) a 40 H ₂ O (hPa) +/- 5 cm H ₂ O (hPa) a 60 H ₂ O (hPa)

Ambu Disposable Pressure Manometer connected to Ambu SPUR II Resuscitator
