

REINVENTING SPECIMEN COLLECTION IN THE BRONCH SUITE

Sterile straight from the pack, intuitive to set up and use, the Ambu® aScope™ 5 Broncho HD Sampler Set with 60mL specimen containers is designed specifically for the bronchoscopy suite. It can be operated by a single user, and with healthcare staffing shortages everywhere, who doesn't need to conserve staff resources wherever possible?

THE AMBU BRONCHO SAMPLER SET:

Safe | Simple | All-in-One

One Package
One Handed
One Clinician

DESIGNED FOR THE BRONCH SUITE

Innovation is a way of life here at Ambu – and we are the only company to make sample collection better in the last 50 years. Although there have been many innovations in bronchoscope and imaging technology, little has changed with BAL and BW since the procedures were first introduced in the 1970s.

Until now.

Ambu is reinventing how clinicians work in the bronch suite. Our mission is to rethink solutions that save lives and improve patient care, and we do that by focusing on our customers' needs. Find out how this sampling solution does just that.

What Makes the Ambu System Unique?

We package our sterile bronchoscope and specimen containers together. That way, you have all the critical components you need in one place. Even in the current staffing crisis, you can manage this procedure just fine – by yourself.

Simplified Specimen Collection Without Assistance

Our integrated, all-in-one, closed-loop sampling system saves time while protecting the sample. No more worry about sample loss. Now you can sample without any taping or fumbling with traps. Your sample stays upright and safe, so there are no spills. Just snap it in place for use. No additional support staff is needed.

You won't have to switch tubing during the sampling procedure, either. The sampler clicks right into the aScope 5 Broncho and allows you to switch between suction and sampling at the turn of a knob.

Operate our BAL sampling solution without assistance and have a high degree of control as you navigate the lungs. Our closed-loop system provides superior lavage and protects you and your staff by reducing the risk of exposure.

WHEN A HOSPITAL CHOOSES AMBU, STAFF CAN STAY FOCUSED ON PATIENT CARE

Experience Ambu Innovation:

- Leader in single-use endoscopy, more than a decade of expertise, 5th generation design
- Proven manufacturing and logistics, supplied over 1.5 million endoscopes last year
- 2 sizes to address advanced bronchoscopy procedures in the bronchoscopy suite, OR and ICU
- 3 sizes covering bronchoscopy procedures performed in the OR and ICU
- Integrated sampling solution for safe and streamlined BAL/BW procedures
- Low capital investment
- EHR connectivity via LAN/WiFi at no additional cost
- System works with our single-use urology and ENT endoscopes
- Developing video laryngoscope solution
- Clinical training resource onsite
- Health economics team to support hospital budget impact analysis
- Keep aScope out of the landfill with aScope Sustainability Program
