

Ambu® aScope™ 4 RhinoLaryngo Intervention

The single-use flexible rhinolaryngoscope

Key Benefits

- Perform therapeutic procedures whenever you need to
- High quality imaging on the full-HD Ambu® aView™ 2 Advance monitor
- Wide range of EHR connectivity options
- Transfer patient imaging data to PACS
- Low investment cost and complete cost transparency

Be more productive, wherever your work takes you

Whether you need high quality imaging and easy connectivity options for the outpatient clinic or a portable grab-and-go solution for when you're called to a consult, Ambu aScope 4 RhinoLaryngo can help you be more productive.

Excellent imaging and connectivity for the therapeutic procedures

The aScope 4 RhinoLaryngo Intervention endoscope is an excellent choice for therapeutic procedures. It is ready when you are, requires no post-procedural handling and comes at a low investment cost, which makes it particularly suitable for outpatient-clinic biopsies.

The solution includes the high-quality, portable full-HD Ambu aView 2 Advance monitor. The monitor's excellent imaging capabilities combined with the scope's high-bending angles and precise tip motion enable you to identify anatomical structures confidently.

Furthermore, the solution enables you to record images and videos of the procedure, which you can then transfer to the PACS to enable access from your Electric Health Medical Records (EHR) system.

Single-use efficiency streamlines your workflow

The aScope 4 RhinoLaryngo endoscope is a single-use flexible rhinolaryngoscope that helps you be more productive:

- No cost or hassle associated with cleaning and repairs
- Simply take it with you, use it and then discard
- High-quality video imaging that doesn't compromise on the portability you require for consultations outside the clinic
- A brand-new endoscope with the same high quality at every procedure

You can always count on cost transparency with the aScope 4 RhinoLaryngo endoscope.

Specifications

Optical system	
Field of View	85°
Direction of View	0° (forward viewing)
Depth of Field	6-50 mm
Illumination method	LED
Insertion portion	
Bending section	130° up, 130° down
Insertion cord diameter	5.0 mm
Distal end diameter	5.4 mm
Maximum diameter of insertion portion	5.5 mm
Minimum endotracheal tube size (inner diameter)	6.0 mm
Working length	350 mm
Channel	
Average inner diameter	2.2 mm
Minimum instrument channel width	2.0 mm
Suction connector	
Connecting tube inner diameter range	Ø7mm +/- 1mm
Operating environment, storage & transportation	
Temperature - transportation	10 ~ 40° C (50 to 104° F)
Temperature - operating environment	10 ~ 40° C (50 to 104° F)
Temperature - storage	10 ~ 25° C (50 to 77° F)
Relative humidity	30 ~ 85%
Atmospheric pressure	80 ~ 109 kPa
Altitude	≤2000 m
Sterilization	
Method of sterilization	ETO

Ambu aScope 4 RhinoLaryngo Intervention and Ambu aView 2 Advance

aScope 4 RhinoLaryngo Intervention is always comfortable to hold thanks to its lightweight and ergonomic design.
