

FAQ: ENT - Always Available

Ambu® aScope™ 4 RhinoLaryngo

A recent U.S. Food and Drug Administration import alert has halted the U.S. entry of certain endoscopes, possibly creating sudden supply shortages that could disrupt patient care. But at Ambu, we're built differently – here are some frequently asked questions about how Ambu can help you keep running smoothly.

Q: What's going on with the FDA shipping hold?

A: Recently, **the FDA issued an import alert** that's affecting certain ENT endoscopes manufactured in Japan. This is causing unexpected supply disruptions for some providers. Ambu is not affected – and we're here to help you avoid delays and keep your patient schedule running smoothly. Our global distribution and manufacturing infrastructure enables us to ensure supply chain stability to keep you working.

Q: How does Ambu keep supply reliable during this hold?

A: Ambu's global manufacturing and distribution network means you stay stocked even when others can't deliver. With production in Indiana, Mexico, Malaysia, and China, plus prominent U.S. and global headquarters operations, we ensure consistent, dependable availability for your ENT needs.

Q: Why choose Ambu when others are facing shortages?

A: While competitors deal with import alerts and inventory gaps, Ambu keeps you ready for every procedure. Our single-use ENT scopes are always available, so you can deliver seamless care without last-minute surprises or rescheduling headaches. We leverage our global supply chain strength to support our customers and patients around the world.

Q: Are Ambu scopes FDA-cleared and compliant?

A: Yes. All Ambu ENT scopes are FDA-cleared and meet rigorous U.S. regulatory standards. You can rely on our products to deliver safe, high-quality care without disruption.

Ambu

Q: Which Ambu ENT products help avoid procedural delays?

A: Our single-use **Ambu® aScope™ 4 RhinoLaryngo Slim** is designed for nasal endoscopy and laryngoscopy procedures and the **Ambu® aScope™ 4 RhinoLaryngo Intervention** for therapeutic ENT procedures. Paired with the **Ambu® aView™ 2 Advance** display, they deliver clear imaging, easy documentation and a smooth workflow – every time.

Q: Can I use the same Ambu display units in other clinical areas?

A: Yes, by adopting Ambu, you can use our displays across specialties. Designed to work with our portfolio of single-use endoscopes, our **Ambu® aView™ 2 Advance** and **Ambu® aBox™ 2** displays provide you with plug-and-play compatibility across a range of clinical areas and endoscopy procedures.

Q: How do Ambu scopes simplify my workflow?

A: Ambu ENT scopes enable faster setup, fewer interruptions and more time to focus on delivering great patient care – helping you keep procedures on time and patients happy. They arrive ready to go with guaranteed sterility, single-use efficiency and high-quality video imaging in a lightweight design that is there when you need it and requires no white balancing.

Q: How quickly can I get Ambu scopes if I'm affected by a shortage?

A: **Fast.** Ambu has inventory in place and a robust distribution network ready to respond. Whether you need to ramp up quickly or replace a delayed shipment, we'll get you what you need – when you need it. Also, there's little-to-no learning curve, Ambu scopes are intuitive, easy to use and require no reprocessing. We offer evaluations and clinical support so you can see the performance and workflow benefits of Ambu single-use scopes firsthand before making a switch.
